

## **BLOCKBUSTER - C557**

**Extremely powerful liquid to rapidly unblock and open drains**

**BLOCKBUSTER** is a concentrated product containing Sulphuric Acid designed to rapidly break down organic material in waste pipes to restore flow and clear blockages.

### **FEATURES**

- Concentrated containing 93% Sulphuric Acid.
- Rapidly breaks down organic deposits and paper from drains and waste pipes.
- Generates heat on dilution to soften fat and grease.
- Heavier than water, flowing around the waste tap to the source of restriction.
- Restores flow and clears blockages.

### **APPLICATIONS**

- Blockbuster provides a powerful liquid drain preparation for clearing blocked drains, sinks, toilets & urinals.
- Blockbuster quickly dissolves organic obstructions, such as grease, hair, textiles, sludge, soap etc
- Removes lime scale & rust deposits.

### **DIRECTIONS FOR USE**

1. For professional use only.
2. Read the label and MSDS carefully before use.
3. Wear appropriate protective clothing, gloves and eye/face protection.
4. DO NOT MIX WITH BLEACH or other cleaning chemicals.
5. Do not apply if the toilet/drain is overflowing. Remove excess fluid where appropriate.
6. Assess where the likely source of the blockage is. If the drain is totally blocked with no flow and the blockage is too far away, Blockbuster would not be an appropriate treatment and a qualified drainage engineer/plumber should be contacted.
7. Pour Blockbuster carefully and slowly into the drain (do not add water to the product).
8. Allow to stand for up to 15 minutes.
9. If the blockage has cleared, carefully flush the pipe work with water. If drainage is slow, repeat the process.

In the event of the blockage not clearing, a drainage engineer/plumber should be contacted. Ensure that they are warned that the drain contains a concentrated acid solution.

### **DOSE LEVELS**

Small drains : 0.25 Litres  
3" – 4" drains : 1 Litre  
6" – 8" drains : 2 Litres  
Grease Traps : 0.5 - 1 Litre

### **TECHNICAL DATA**

APPEARANCE : Viscous Liquid  
COLOUR : Black  
ODOUR : Characteristic/acidic  
SOLUBILITY : Completely soluble in water  
RELATIVE DENSITY : 1.80  
pH-VALUE : 1  
PACK SIZE : 12 x 1 litre, 4 x 2.5 litre

### **APPROVALS**

British Coal Industry Assessment No: 2762

### **USAGE PRECAUTIONS**

Read and follow manufacturer's recommendations. Avoid spilling, skin and eye contact. AVOID ALL CONTACT! Never add water to acid! Do not use in confined spaces without adequate ventilation. Do not mix with bleach or other toilet cleaners.

### **STORAGE PRECAUTIONS**

Store in tightly closed original container in a dry and cool place.

### **HEALTH AND SAFETY**

Health and Safety Data sheet available separately.
