

PRE-SOAK POWDER - C868

A chlorine free tannin and stain removing powder

PRE-SOAK POWDER is used for the removal of tannin and deposits from cups and utensils.

FEATURES

- Pre-Soak Powder is a specially formulated blend of alkaline builders, water softeners, surfactants and de-stainers designed to remove stubborn stains such as tannin from most types of crockery and other utensils.
- Pre-Soak Powder may be used on glass, plastic and stainless steel.
- Chlorine and caustic free formulation enhances the life of glazed ware.
- Removes heavy tannin deposits quickly and effectively from cups, teapots and percolators.
- Highly concentrated offering excellent dilution rates and low cost in use.
- Un perfumed.

APPLICATIONS

- Pre-Soak Powder may be used in all areas where tannin staining is a problem.
- Typical areas of application would include kitchens, canteens, restaurants, cafes etc.

DIRECTIONS FOR USE

- Pre-Soak Powder should be used diluted at a rate of 50g (1 scoop) per litre of water.
- Soak items for between 5 and 15 minutes.
- Wipe with a cloth or washing up brush to remove stubborn stains.
- Rinse thoroughly with clean water.
