

PROCARE - C006

Universal pre, during and after work cream

PROCARE has been formulated to provide a universal treatment to protect the skin before, during and after work. Procare is particularly effective for wet work.

FEATURES

- Universal cream that protects the skin against contact with aqueous and non-aqueous contaminants.
- Procare can also be used to moisturise the skin, keeping hands supple and preventing dryness.
- Excellent after work cream.
- Removes the need for several different creams.
- Advanced fast absorption formula to avoid "sticky feel".
- Fragrance free and therefore ideal for use in food preparation areas.

APPLICATIONS

- Suitable for use in a wide range of industrial and commercial environments including food processing.
- Suitable for use through EQ441/EQ432/EQ442 Dispensers.

DIRECTIONS FOR USE

Use Procare as supplied. Apply before work to protect the skin against contact with water and non-water based contaminants. Apply after each hand wash and at the end of the working day apply to moisturise and replenish skin.
